Designed according to the latest industrial organization concepts, this is one part of R&D Department with a full know-how of the complete production process.

Tooling group is responsibility for all aspects of products designated for the assembly lines—from the maintenance of tooling and process, through to the management of cross-department processes such as manufacturing engineering and quality.

Stamping and injection dies or molds are built from scratch tanks to its highly skills human resources and technologically advanced equipment. Each individual die or mold undergoes stringent quality control to guarantee final product quality.
